## ABOUT W.T

WildTales is an  
innovative mobile  
application designed  
to augment reality and  
bridge the gap  
between digital and  
natural world.

This is through  
promoting outdoor  
exploration targeting  
children aged 5-10  
years old.

## PROBLEM...

How can we enhance the outdoor experience for families using a phone, but without the need for an internet connection and continuous interaction with the phone?

## SOLUTION!!!

WildTales addresses this by providing 'Journeys' that turn ordinary walks into interactive learning experiences.

Giving Parents and their children the ability to unlock rewards while connecting with nature and the chance to connect.

**"THE PRIMARY GOAL IS TO BE ABLE TO ENHANCE THE CHILDREN'S CURIOSITY OF NATURE WHILE ALSO BUILDING ON THE RELATIONSHIP OF PARENTS AND THEIR CHILDREN"**
